ABOUT ME

My name is Joshua Agboola, and I'm a 22 year old software engineer. Programming is my passion and it allows me to bring to life all the crazy imaginative ideas that run through my head. It allows me to build what I dream about.
I challenge myself everyday, pushing my boundaries and improving my coding skills.

PROJECTS

AJOnline

A dynamic and visually engaging web portfolio showcasing my skills in web development and design. This portfolio highlights my expertise in creating responsive and user-friendly websites using modern technologies.

https://ajonline.netlify.app

Xalen

A self learning conversational chatbot built with MERN Stack JavaScript, designed to hold funny and witty conversations with users through artificial intelligence methods that enable the program to communicate like a real human being.

https:xalen.netlify.app

Echo Social (Ongoing)

A simple and basic social media platform focused on bringing together people who share similar interests, preferences, and hobbies.

https://echosocial.netlify.app
